

FLOURISH Skin & Laser

Introducing the new option in
medical strength skin care:

This new skin optimizing system is one of the leading medical strength lines used and recommended in a majority of the dermatology and cosmetic offices in Canada. Mary

discovered this exciting new line when she was doing a laser training at a dermatology clinic. The doctor and his staff had nothing but rave reviews about Alyria and its versatility for many different skin types. There are excellent options for those of you out there with super-oily skin, as well as very hydrating soothing options for those of you oober-dry skin. We've each already found our favorite items! Amy loves the new Clarifying Cleanser and the Oil-free Hydrating lotion for oily skin. Mary loves the Multi-Correction Night Serum with 2% Retinol at night and the Multi-Age Correction with SPF for the day. Schedule a quick skin care consult with us and we can help determine which Alyria products are right for you. (360) 430-9133

It's time to get rid of that HAIR

Stop wasting your mornings shaving all that unwanted body hair, only to have it grow back in a day or two. Laser hair removal has been around a long time and it is very effective. We've had patients claim that doing Laser hair removal has literally changed their lives. It usually takes about 6 treatments to reduce the hair to less than 20%. Then after that, you may need to continue monthly with maintenance or touch up treatments to get any sparse hairs left behind. After the hair is mostly gone, just an occasional touch-up treatment usually 1-2 times per year can help keep any new hairs from popping up. Now is the time to get started on your bikini and underarms for summer vacations! Prepay for a package of Bikini, Landing Strip or Brazilian and get your underarms for free! Call us today for your free consultation and to set up your first appointment.

Change in Policy

We are sorry to say, that we cannot accept personal checks any longer here at Flourish. We like to be as accommodating as possible, but due to the high volume of returned checks in the past year we simply cannot take the loss anymore. We apologize for the inconvenience and appreciate your loyalty.

Fungus Be Gone!

Just a little reminder, that we can treat Toenail Fungus with our laser! It takes a minimum of 4 treatments, and in some cases a few touch ups after that. The most difficult part is the waiting game afterwards for the healthy nail to grow out. It can take 6 months to a year for a nail to grow out completely. We are seeing good success and want to help you with your toenail fungus!

Alyria featured products of the season

We told you a bit about our new line Alyria, and now we want to highlight a few of our favorite products for the season. The new Alyria Anti-Dark Circle Eye Cream is clinically proven to significantly reduce the appearance of dark circles under the eyes and provides an immediate concealing effect. Regular use under the eyes will provide brighter, more uniform and younger-looking skin. The key ingredient is Haloxyl which actually targets and lifts out the iron deposits left from tiny blood vessels in that thin skin area.

Our other favorite pick of the season is the Alyria Intense Lip Volumizer. Yes....it really does work! It is formulated with Niacin (vitamin B3) and an anti-aging blend of retinol and biopeptides. This is not your average plumping lip gloss, this is a treatment for your lips that keeps getting better and better. And one tube lasts a long time. It's Amy's new favorite!
